Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-22 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no description in the specification as originally filed of bonding substructure having a top portion including isolated silicon sections, each bounded subjacently by horizontal sections of a conductive material and laterally by vertical

sections of conductive material and a bottom portion formed of a dielectric film to top surface of substrate. The step of lines 4-8 in claim 1 is only shown to be formed after the bonding step.

(See 1242 OG 168 p. 172).

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:
